JAVA (Basic) Certification-HackerRank	January 2026

Projects

AI-Agent	github.com/mhazil/ai-agent 
◦ An AI agent that plans and executes shell commands based on users input using a locally hosted LLM (via LMStudio). The agent can run from the terminal or as a VS Code extension. It uses AI to plan tasks, asks for user approval, executes commands, and retries if needed. ◦ Tools Used: Python	
Shopping Bill Program	github.com/mhazil/ShoppingBill 
◦ To develop a user-friendly application to manage shopping bills by capturing product details, calculating total prices, and generating a detailed bill ◦ Tools Used: JAVA
